

Proposal: Foosball Maintenance 2009

What is Needed

- 4 men (2 yellow, 2 black) @ \$4.95 each = \$19.80
 - o There are no men that need to be replaced, but as soon as one breaks the table will be rendered useless until the broken man is fixed.
 - o Should last at least one year (probably 2-3).

- 24 replacement pins @ \$0.35 each = \$8.40
 - o Replacement pins are what keep the men from rotating around the bar and break far more often than the men do.
 - o There are currently a couple of broken pins that need to be replaced.
 - o Should last 3-4 years (bulk order = discount).

Total (including ground shipping): **\$38.10**

Misc

- *The labor is performed by grad students.*
- *Annual maintenance costs about \$15-20/year, but not necessary to order parts every year.*
- *Parts should be locked up, dated log of usage.*
