Figure 2.22: [Corrected, page 90]. Subautomaton construction for automata $G_1$ and $G_2$ in Fig. 2.21 (Example 2.22). $G'_1 \subseteq G'_2$. 
Figure 2.23: [Corrected, page 92] Strict subautomaton construction for automata $G_1$ and $G_2$ in Fig. 2.21 (Example 2.23).

$G_1 \subseteq G_2$. To obtain $\tilde{G}_1$, it suffices to delete states $(\text{dead}, 8), (\text{dead}, 4), (\text{dead}, 7)$ and mark only states $(D, 5), (D, 6), (D, 4)$.
